We are proud to introduce you to this magnificent 19 bedroom property built in 1640 for the Orsini family on the ruins of two Imperial Roman villas and situated in 6,000 square metres of private parkland. It later was fully restored to its current splendor by J Paul Getty who used it as a private seaside home. During the renovation the Roman ruins were uncovered and are now open for guests to visit along with a small museum.

Although the property has been run as a hotel it still retains the feeling of a grand private home and is very much as Getty left it.

There are 11 luxurious bedrooms and 8 superb suites giving accommodation for up to 38 guests. There is a heated indoor pool, tennis court and spa for guests use. Its modern facilities include air conditioning, wireless internet access, plasma televisions with Sky channels, personal safes and mini bars.

The beautiful dining room and outdoor terraces are where meals prepared by the resident Michelin starred chef can be served and there are sumptuous living rooms and libraries.

Staff can organize guided tours, boat trips, fishing, sailing and golf and there is also a private helipad.

The entire property can be rented by the night or week so you can truly live Getty's billionaire lifestyle.
